

# PROSTATE CANCER: KNOW YOUR RISKS

#AskPCFA

## 1.3 million diagnosed

Prostate cancer is an important public health issue and **one of the most important health issues faced by Australian men.** Globally, 1.3 million men are diagnosed every year.

There are over **200,000 Australian men** currently living with a previous diagnosis of prostate cancer.

**1 in every 7 Aussie men** are likely to be diagnosed during their lifetime.

This year around **20,000 Australian men** will be diagnosed and 3,500 will die of the disease.

## WHAT CAN YOU DO TO MANAGE YOUR RISKS?

Know your family history
